

KOCKS ARDELT KRANBAU GmbH is an established and respected crane manufacturer serving customers around the world. Our products include large crane systems for sea ports, inland ports, steelworks, shipyards and other transshipment facilities.

We are now seeking to fill the following position for our **site in Eberswalde** to expand and strengthen our team :

Electrical service engineer (m/f/n)

Your tasks:

- Error diagnosis, detection of defects, clarification of cause of defects and finding solutions/making decisions for their elimination according to general guidelines
- Repairs, conversions, modernisations, optimisation of controls on in-house and external systems
- Customer advice, preparation of protocol documentation
- Accident prevention tests
- Coordination of material supply and external personnel at construction sites
- Instruction of crane personnel at home and abroad, service training
- Independent decisions on warranty cases

What we expect:

- Successfully completed vocational training as an electrical engineer/mechanical engineer or comparable training
- Good knowledge of the use of technical documentation
- Confident use of standard MS Office applications and experience in using ERP systems
- Good written and spoken English, other foreign languages advantageous (e.g. Russian)
- Willingness to travel, comfortable working at height
- Quick comprehension and structured working methods
- Communication, cooperation and teamwork skills, independent working style, resilience, pro-activity and flexibility

What we offer:

We offer a modern workplace with flat hierarchies, a good working environment and space for ideas working on interesting projects. A dynamic, innovative and ambitious team and performance-oriented remuneration await you. Supporting professional development through further training is a standard practice in our company.

If you are interested in this job that offers autonomous, challenging and versatile work, and you feel your skills and abilities are a good match for the role, please send us your detailed application documents with an indication of your potential start date:
